

## **Scoot to be Deactivated from Worldspan (1P) System**

Dear Trade Partners,

Scoot will be deactivated from Worldspan (1P) system with effect from 29 August 2024. Scoot (TR) marketed flights will not be available in Schedules and Availability in Worldspan system and agents currently utilizing this system will not be able to create or ticket TR bookings.

After the deactivation, unflown TR bookings will appear as active in agents' PNR but any changes completed by agent will not be synced on TR and new ETKT transactions (current 1P agents ticketed on 169 and 618 tickets) will be restricted. Agents with active TR bookings on 1P will be required to directly for all assistance on any bookings and ETKT changes.

### Recommendations for agents prior to deactivation of Worldspan (1P) system on 29 August 2024

- Agents may issue tickets for TR bookings prior to 29 August 2024
- Agents may cancel unticketed TR bookings prior to deactivation and create TR bookings using other GDS or via Scoot Agency Booking Portal

Scoot will continue to be available on other GDS platforms, including Amadeus (1A), Abacus (1B), Travelsky (1E), Infini (1F), Galileo (1G) and Sabre (1S).
